Hiring Manager
Siemens
El Qahera El Gididaa, Egypt

Dear Hiring Manager,

I am writing to apply for the **SSP Intern** position at Siemens. As a developer with experience building and deploying production systems, I am confident that my technical skills and problem-solving approach align well with the needs of your team.

Most recently, I architected and deployed a multi-language tour booking platform serving 115 monthly active users across 6+ countries. I built the full observability stack with Prometheus and Grafana, implemented RBAC with JWT authentication, and automated CI/CD deployments. My background as a Siemens SSP Intern includes Computer Science student with strong foundation in OOP (C#, Java, C++ principles), Linux systems, and scripting (Python, Bash). Experienced in building production systems with modern CI/CD workflows and leveraging AI-assisted development tools for efficient code generation, testing, and debugging. Seeking an SW Development Internship to contribute to R&D in memory and storage solutions.

I am excited about the opportunity to contribute to Siemens and would welcome the chance to discuss how my background aligns with your needs.

Best regards,

Ahmed Saleh
