

Node.js Developer

Education

Alamein International University (AIU) — Alexandria, Egypt

Expected May 2027

Bachelor of Science (B.Sc.), Computer Science

- **Coursework:** Data Structures and Algorithms, System Design, Advanced Database Systems, Information Security, Object-Oriented Programming

Work Experience

Node.js Developer

Jan 2025 – Present

Paradise Sharm Tours

paradisesharm.com

- Architected and deployed a multi-language tour booking platform with Express.js, MongoDB, and Traefik reverse proxy with automated SSL/TLS, serving 174 MAU across 6 countries (US, EG, IT, IE, SE, UK)
- Built observability stack with Prometheus, Grafana, and k6 stress testing (up to 220 concurrent VUs, 2-hour soak tests) for production API monitoring and performance tuning
- Implemented RBAC with JWT refresh tokens, rate limiting, Helmet security headers, and automated daily MongoDB backups with 7-day retention

Projects

E-commerce API | TypeScript, Node.js, Express, MongoDB, Stripe

[GitHub](#)

- Built a production-ready ecommerce REST API with 8+ modules (products, orders, cart, reviews, coupons) featuring Stripe payment integration with webhook handling and email verification flows
- Implemented BaseController pattern for DRY CRUD operations, JWT authentication with MFA-protected account deletion, and hardened security (Helmet, NoSQL injection protection, HPP, rate limiting, input sanitization)

Technical Skills

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Backend: Node.js, Express.js, REST APIs, authentication/authorization, input validation, error handling

Databases: MongoDB, MariaDB, MySQL, PostgreSQL

DevOps: Docker, Docker Compose, Git, Linux, GitHub, Bash

Testing: Jest, Supertest, Postman, k6, linting, formatting

Certifications

Object-Oriented Programming Using Java — ITI (Information Technology Institute) — 24 training hours, project-based with HackerRank assessment (Jul-Aug 2025)

Leadership

Technical Head

Apr 2026 – Present

AIU ICPC Community — Alamein International University (AIU)

- Architecting and developing a full-stack competitive programming platform for a 600-member ICPC community using Next.js and Node.js, featuring problem archives, live contests with real-time leaderboards, and user rating profiles
