Hiring Manager
Stripe
San Francisco

Dear Hiring Manager,

I am writing to apply for the **Backend Engineer** position at Stripe. As a developer with experience building and deploying production systems, I am confident that my technical skills and problem-solving approach align well with the needs of your team.

Most recently, I architected and deployed a multi-language tour booking platform serving 115 monthly active users across 6+ countries. I built the full observability stack with Prometheus and Grafana, implemented RBAC with JWT authentication, and automated CI/CD deployments. The application achieves 91 Performance and 100 Accessibility Lighthouse scores.

I am particularly drawn to Stripe because of REASON_PLACEHOLDER. I am excited about the opportunity to contribute to COMPANY_PROJECT and would welcome the chance to discuss how my background aligns with your needs.

(Edit REASON_PLACEHOLDER and COMPANY_PROJECT in the generated .tex file)

Best regards,

Ahmed Saleh
