github.com/AbooSalh

Summary

.NET developer building backend systems and APIs with C#, ASP.NET Core, and Entity Framework Core. Strong foundation in REST API design, algorithmic optimization, and CI/CD automation for production-grade applications.

Education

Alamein International University (AIU) — Alexandria, Egypt

Expected May 2027

Bachelor of Science (B.Sc.), Computer Science

- **Coursework:** Data Structures and Algorithms, System Design, Advanced Database Systems, Information Security

Work Experience

Full-Stack Developer

Jan 2025 – Present

Paradise Sharm Tours

paradisesharm.com

- Architected and deployed a multi-language tour booking platform using Next.js, Express.js, MongoDB, and Traefik with automated SSL/TLS, serving 115 monthly active users across 6+ countries
- Built observability stack with Prometheus, Grafana, and k6 stress testing (up to 220 concurrent VUs, 2-hour soak tests) for production monitoring and performance benchmarking
- Implemented RBAC with JWT refresh tokens, rate limiting, and automated daily MongoDB backups with 7-day retention; achieved 91 Lighthouse Performance and 100 Accessibility scores

Projects

Cairo Transportation Network | C#, .NET, Next.js, SQLite, EF Core

[Live Demo](#)

- Engineered a smart-city routing platform processing 35 locations and 74 roads across Greater Cairo using A* emergency routing (39% faster than Dijkstra, 40% fewer node expansions) and 0/1 Knapsack DP for maintenance budget optimization (42% improvement over greedy, serving 78.5% transit demand with 50 vehicles)
- Built a modular monolith ASP.NET Core REST API with IMemoryCache (1ms graph retrieval), Next.js interactive Leaflet map, and automated CI/CD via GitHub Actions, achieving 2ms average algorithm response time

Technical Skills

Languages: C#, TypeScript, JavaScript, Java, Python, SQL, HTML, CSS

Backend: .NET, ASP.NET Core, Entity Framework Core, REST APIs, RBAC, JWT auth, rate limiting

Databases: SQLite, MariaDB, MySQL, PostgreSQL, MongoDB

DevOps: Docker, Docker Compose, GitHub Actions, Git, Bash

Quality: xUnit, SonarQube, Husky, ESLint, Prettier

Certifications

Engineering Practices for Building Quality Software — University of Minnesota

Hands-on Linux Commands & Shell Scripting — IBM

Relational Database Systems — UNAM

Introduction to Databases — Meta

Software Engineering: Software Design — HKUST

Leadership & Achievements

Technical Head

Apr 2026 – Present

AIU ICPC Community — Alamein International University (AIU)

- Designing and developing a Codeforces-style online training platform for AIU ICPC community with problem archives, live contests, real-time rankings, and user profiles

Achievements

Competitive Programming: 35 problems solved, 93.2% acceptance — leetcode.com/u/Unix69/
